

The Bowie & Dick Test Pack

With reference to the European Standard EN 285,
the Bowie & Dick Test is a mandatory test for steam sterilisers.

This functionality test for steam sterilisers needs to be done at the beginning of each working day and after a successful pass of the Bowie & Dick Test Pack the steam steriliser can be released for use.

The Bowie & Dick Test Pack is dedicated for porous loads in pre-vacuum hospital steam sterilisers and complies with EN ISO 11140-1 (Type 2) as well as EN-ISO 11140-4.

The Bowie-Dick tests produce accurate and reproducible results.

The indicator is non reversible and provides an easy and fast interpretation of colour change from yellow to black.

Documentation of results is easy due to attached data input sheet.

The laminated indicator prevents any interaction with ink and the paper is high quality re-cycled paper with ink free from any toxic components.
