

Stainless Steel Spray Gun Accessories

Every cleaning scenario covered

Product Code: 9052 (Premium Set - 6 Spray attachments and holder)

This range of 6 spray attachments are fitted by securely screwing the nozzle to the spray gun tip.

Constructed entirely of stainless steel ensures that these attachments, as with the gun itself, are capable of being used with demineralised water as well as being tolerant of unrestricted steam sterilisation.

The set includes tips that are capable of cleaning catheters, drainage hoses, tubes & valves, surfaces, hollows, syringes & cannulas.

The attachments are available singularly or as a set complete with attachment holder.

Also available are wall & table mounts for the the spray gun (image shown displays the aluminium spray gun), together with an array of spare parts, details of which can be found under Spray Gun Spares on the website.

There is also a universal nozzle which allows the gun to be fitted with the spray head and brush accessories detailed under the Aluminium Spray Gun Equipment. But care should be exercised when using these items as they are unlikely to be compatible with demineralised water.
