

## SST Trays

**Light-weight, portable & secure**  
**Available in a range of sizes to suit any surgical instrument**

**Product Code: SST-2136**

SST trays are a safe and practical means for the collection and transportation of contaminated re-useable sharps and instruments from the point of use to the point of reprocessing.

The trays themselves can be reprocessed by manual or automated washing with the option of sterilisation in consultation with our SST Sterilisation Guide..
